

The Upgrade Group Cisco MCS Memory Upgrades

The Upgrade Group, Inc. carries a line of TUG Compatible and OEM/Approved memory for the Cisco CallManager MCS family. These products are tested for compatibility to insure proper working function within your system and network. TUG manufactured products meet or exceed specifications set forth by Cisco. All Cisco Approved memory products come from the manufacturers supplying Cisco with the memory that they use in these specific systems.

“In response to recent data from Cisco Systems® labs and customers, Cisco has increased the minimum recommended amount of physical memory required to successfully operate Cisco CallManager clusters that are running Version 4.0 and later.” -Cisco Systems®
